

Document Accessibility eXpress Service

Document Accessibility eXpress Service (DAXS) from Accessibil-IT is the first service of its kind to give your clients the ability to easily request an existing PDF document be made accessible by Accessibil-IT. With DAXS, one button provides PDF accessibility that is cost effective, compliant and available on-demand.

Technology

Accessibil-IT has developed a service that inserts a button into all PDF documents currently on your website that are not accessible. Upon opening the PDF, a screen reader user will be notified that by selecting the (DAXS) button, the document will be made accessible by Accessibil-IT and returned to them directly. The now accessible PDF will also be sent to your web administrator for posting on your website.

Process

Accessibil-IT uses a proprietary scanning tool to locate and download all PDFs on your organization's website. The (DAXS) button is inserted into the PDFs which are then reloaded onto your website. When a user selects to have the PDF made accessible; it will be sent by email to our secure servers and placed immediately into our workflow. Accessibil-IT will then implement its industry leading approach to PDF accessibility and return the document to your client on your behalf. In addition you will receive a copy of the now accessible PDF to reload on your website ensuring the document will be accessible to all users from that point forward.

Benefits

- PDF accessibility as an on-demand service provides a cost-effective and worry-free solution for your legacy and archived PDF content
- No additional effort from your staff to ensure document accessibility and compliance
- An annual volume based fee is determined by the number of PDFs being hosted on your site, plus a preferred PDF remediation rate
- Peace-of-mind is provided by Accessibil-IT, the leading provider of PDF accessibility

Compliance

Under the Canadian Charter of Rights and Freedoms and the Accessibility for Ontarians with Disabilities Act (AODA), organizations must provide barrier-free methods for end users to request all documents in an accessible format.

With a hosted PDF accessibility service from Accessibil-IT, your organization meets its obligation under the law, and establishes your organization as a barrier-free content author.
